

AI USB Conference Camera

FEATURE SPOTLIGHT

- **Portable All-In-One design**

Sleek, easy to carry, and a snap to set up and use to expand the collaborative potential of the anywhere workplace.

- **Perfect for Small Workgroups**

Optimized for teams of 1-6, experience FHD 1080p video, 360° sound, which can control almost any application environment and greatly improve work efficiency.

- **AI USB Camera**

Supported Auto Framing and Speaker Tracking functions.

- **Integrated full duplex speaker and noise reduction microphone**

All conference members can make clear video calls even if they are 5 meters away from the camera.

- **Omnidirectional microphone pickup and echo cancellation**

Let the conversation happen in the same conference room.

- **Multi-Device Connectivity**

Simply connect PC or Mac[®] to conduct life-like meetings within your own familiar computing environment.

NexPod N109

Video conferencing for small teams deserves better conditions, rather than squeezing around a computer camera or begging an overbooked conference room system to allocate some time. NexPod combines high-definition video quality with crystal-clear sound effects. It is suitable for small groups of six or less to conduct video conferences. The package is simple and affordable. It provides crisp high-definition picture quality and clear and transparent sound quality. Teams can conduct their own video conferences anywhere in the office. NexPod is a full-featured video and audio device, designed for small groups, suitable for crowded cubicles, private offices and small meeting spaces. 110° wide-angle field of view, high-definition video and crystal clear audio, suitable for small groups of 6 or less, can clearly see and hear all participants.

GoToMeeting

BlueJeans

Google Meet

Skype

Amazon Chime

Cisco Webex

Microsoft Teams

Zoom

- **USB Plug-and-Play Connectivity**

With no special software, training, or maintenance required, connecting to a video conference has never been easier.

- **Works with Most Video Conference Applications**

Users are free to use the desktop video conferencing program of their choice.
